

Lukasz Głowacz

FRONTEND-FOCUSED FULL STACK DEVELOPER

contact@lukaszglowacz.com +48 690 250 957 linkedin.com/in/lukasz-glowacz-dev github.com/lukaszglowacz

Frontend-focused Full Stack Developer running an independent software consultancy (Gurudo). Delivering B2B contracts for clients in the tech sector alongside own-product development. Specialising in Next.js 14 / React 18 / TypeScript frontends integrated with Django REST Framework backends. Experienced in complete delivery cycles: Figma → implementation → CI/CD → Vercel staging & production. Available for remote B2B contracts only.

TECHNICAL SKILLS

Core (daily): TypeScript · React 18 · Next.js 14 (App Router, Server Components, Middleware) · Python · Django REST Framework · PostgreSQL

Frontend: Tailwind CSS · React Query · Zustand · NextAuth.js (JWT + OAuth 2.0) · React Hook Form · Yup · next-intl / i18n (pl/en/de/uk-UA) · framer-motion · react-slick

API & Integrations: REST APIs · Data API (batch fetching, cursor pagination) · JWT SSO integration · Tpay (cards, BLIK, transfers) · Stripe · Google Maps API · Webhook integration

Backend: Django 3.2 · DRF · Celery · Redis · pytest · Django i18n (gettext / compilemessages)

Tooling & DevOps: Docker Compose · GitHub Actions · CI/CD · Vercel (staging + production deploy hooks) · Jira · Figma (design-to-code) · ESLint · Vitest/Jest

EXPERIENCE

Gurudo

Apr 2024 – Present

Software Consultancy · Enskild firma · Stockholm, Sweden

Independent consultancy delivering frontend and full-stack B2B contracts for tech companies, alongside own-product development. Client engagements subject to NDA where applicable.

► PROJECT **Confidential Client — Enterprise Sports Tech Platform**

Dec 2025 – Present · NDA · Remote · thousands of active users across Poland

Frontend Developer (Full Stack) · Next.js 14 · React 18 · TypeScript · Django REST Framework

- Built and shipped the complete public-facing site — landing, About Us, Contact, Premium — translated into 4 languages (pl/en/de/uk-UA) with next-intl and session-aware Next.js Middleware routing.
- Implemented full SEO infrastructure before product launch: metadata, Open Graph, Twitter Card, canonical URLs, hreflang alternates, dynamic sitemap.xml — ~28 public pages across 4 locales.
- Integrated Data API batch fetching via React Context (PlayerScoresProvider), replacing per-item backend calls.
- Fixed null-token pagination bug in React Query infinite scroll (getNextPageParam returning null caused re-fetch of page 1 and duplicate career stats entries); added deduplication layer as safety net.
- Fixed non-obvious React Query stale data bug: invalidateQueries without active observers does not refetch — resolved with useEffect on isOpen state; refactored shared form components with TypeScript generic constraints (IBaseDataCommonForm) to support optional field schemas across roles.
- Built JWT SSO integration with external microservice: conditional UI by subscription status, token fetch with configurable TTL, external portal redirect. Backend: webhook on purchase, JWT generation.
- Fixed broken premium purchase flow on production — incorrect product name mapping to payment API (Tpay).
- Maintained CI/CD: GitHub Actions ci.yml, Vercel deploy hooks for staging and production, develop → staging → master PR flow.
- Backend contributions: Django i18n setup (gettext/compilemessages in Dockerfile), notification templates with multilingual .po/.mo files.

► OWN PRODUCT **Gurudo Geo — Workforce Management SaaS**

Apr 2024 – Nov 2025 · Production · paying customers · gurudo.se

Full Stack Developer · Django REST Framework · React · TypeScript · PostgreSQL · Stripe · Docker

- Designed and built end-to-end: geolocation validation (100m radius), JWT auth, role-based permissions (manager/worker), automated PDF report generation.
- React + TypeScript frontend: real-time workforce monitoring dashboard, mobile-first responsive design, Stripe per-seat subscription billing with webhook handling, Klaviyo email automation.
- Deployed and maintained production system on DigitalOcean with Docker; handled customer onboarding and support through full product lifecycle.

NOTABLE PROJECTS

Sports Messenger · Dec 2025 · Technical recruitment project

Full-stack messaging app built in 4 hours. React 18 + TypeScript + Material-UI, FastAPI async backend, Zustand, role-based messaging limits, SQLAlchemy, Pydantic, 28 automated tests (pytest + Vitest), 69% coverage, Docker Compose.

Gurudo Geo · Production SaaS with paying customers · github.com/lukaszglowacz

Geolocation workforce management SaaS for construction companies. Django REST Framework · React · TypeScript · PostgreSQL · Stripe · Docker · DigitalOcean.

EDUCATION

Full-Stack Software Development Diploma · CODE Institute 2021 – 2022

Bachelor of Science (Chemistry) · University of Gdańsk 2004 – 2007
